- 1. The solvent inkjet printer /double heads inkjet printer can edit other non-working information when small inkjet printer works, and can change printing content instantly.
- 2. The small inkjet printer/printer inkjet can achieve online anti-fake printing and variable bar code printing. It can also directly uses SD card or USB disk to print garbled and random code.
- 3. Inkjet marking machine can receive BMP patterns made by computers and can also edit special characters or patterns directly on the touch screen (supporting personal signature).

Product Features

- 1. The solvent inkjet printer adopts the international advanced built-in diaphragm pump technology. The ink pump, solvent pump, recycling pump and circulation pump are integrated. It defeats the traditional gear pump and don' t need compressed air. Compared with the gear pump, it has a great advantage.
- 2. The service life is several times longer than the gear pump. The small inkjet printer uses research results of bionics, which makes sure of zero wear and low maintenance cost. Besides, the ink will not be affected by mechanical friction of the gear pump. It can greatly extend the service life of ink and reduce production costs.
- 3. The small inkjet printer adopts the advanced technology to control ink density and viscosity automatically. The system isn' t affected by environment, temperature and boot time, which ensures that the machine works stably and reliably.

Model	PM-800 Double Heads LCD Touching Screen Inkjet Printing Machine
Print Lines	1-4 lines (a single nozzle)
Print Dots	5X5/4X7/5X7/7X9/6X12/8X16/12X16/11X24/16X32/32 self-written dot array
Print Speed	3m/s (5X7)
Operation Interface	Color touch screen, Chinese and English menu
Storage Information	No limitation
 Print Content	Date, time, automatic date, automatic date of expiry, number, serial number, four-group counter, length meter, self pattern, variable bar code, security code, support multi-language and various fonts (support personal signature)
Print Length	1024 5X7 dot array
Chinese Input	Spelling input method and location code input method
Print Ink	Various color optional, such as black, blue and red
Character Height	1-15mm (adjustable)
Print Distance	1-9 times, can widen a single character
Character Direction	Support normal character, reverse character, inverted character and reverse and inverted character, can set printing direction only for a single character.
Character Spacing	1-8 times, can be edit randomly
Nozzle	Suitable for all kinds of terrible environment
